PROJECTS

Experro (DXP)
experro.com

Experro is the all-in-one Digital Experience Platform. Packed with a Headless CMS, Visual Site Builder, AI search & merchandising, customer data platform, and marketing automation features. I was assigned the task of creating a platform from scratch, and conducting extensive research and competitive analysis were key steps in developing this product. My primary emphasis was on enhancing the user experience, as CMS products often prove challenging for users to comprehend.

Salesmate (CRM)
salesmate.io

Salesmate is like a helpful assistant for businesses. It's a CRM platform that brings together all your important information, tools, and tasks. By automating these processes, it makes your team's work smoother and helps your business grow better. My job was to create a special system for designing and building this platform. This system is made for both designers and developers to use.

Aquaculture Stewardship Council
asc-aqua.org

The Aquaculture Stewardship Council is an independent non-profit organisation and labelling organization that establishes protocol on farmed seafood while ensuring sustainable aquaculture. So my role was to design a platform where farmers can calculate their farming expense and track their fish production based on their real data.
I had the responsibility of revamping and improving the platform's user interface and user experience to provide a more enhanced and easy to understand for the users.

Across The Globe
atg.world

ATG is a platform that facilitates connections and collaboration among individuals who share common interests. It serves as a space where like-minded people can connect, collaborate, and derive personal growth from each other's passions. In my role, I was accountable for redesigning, as well as enhancing the platform's UI/UX for an improved user experience.

Hobby Cue
hobbycue.com

Hobby Cue is an eco-system of experts, teachers, sellers and places to practice, participate or perform in different type of hobbies. So it is a community based platform on different hobbies from different world and you can also sell your products and arts on this platform. I was tasked with designing the platform in a manner that elevates the overall user journey and satisfaction, ensuring an enhanced experience for all users.
